

ADVANCED METER INSTALLATION INFORMATION

We are preparing to replace your electric meter in the next few weeks with advanced technology. Advanced meters provide two-way communication between Dakota Electric's office and your meter. The new technology will replace outdated equipment and provide benefits for Dakota Electric and its members.

REPLACING AGING INFRASTRUCTURE

*Current meters & equipment
have reached end of life*

IMPROVING OUTAGE NOTIFICATION & RESTORATION

*Automatic reporting of
outages to our office*

INCREASING SYSTEM EFFICIENCIES

*Such as remote operation
& meter reading*

MORE ENERGY INFORMATION FOR YOU

*More information about
your daily energy use*

We are preparing to replace your electric meter at

. Our current metering system is more than 30 years old and will be replaced with improved technology to serve you better.

Will my power be interrupted during the installation?

You may experience a brief outage when we replace the meter. The outage should last only a few minutes.

Do I need to be home when you install the new meter?

No, all work will be completed outside, but we will knock on your door before the meter installation attempt. Please make sure your meter is accessible. Photos will be taken before and after installation.

Who will replace my meter? Dakota Electric has partnered with Anixter who is a certified and approved contractor to install the meters. Every vehicle will be labeled with Anixter and Dakota Electric logos, and installers will provide proper identification at your request.

How will I know when my meter has been upgraded?

Installers will leave behind a door hanger communicating the meter change.

Thank you for your patience as we work to improve our service to you.
