

# ENERGY WISE

FOR YOUR HOME

**A pool means summer family fun. But it can also mean higher utility bills to keep it clean and comfortable.**

**A pool-pump variable speed motor and heat-pump pool heater can save money on your energy bill without a time out from pool fun.**

## **POOL PUMPS & HEATERS**

### **ENERGY STAR® pool pump variable speed motor**

Variable speed pumps have the ability to adjust automatically using pressure sensors, and can also be scheduled through built-in automation systems to align with pool usage patterns. Dakota Electric® offers a rebate of \$200 on any new ENERGY STAR qualified multi-speed, variable speed and variable-flow pumps with an Energy Factor (EF)  $\geq 3.8$ . To verify that a pump is ENERGY STAR qualified, check online at [www.energystar.gov](http://www.energystar.gov).

### **Heat pump pool heater**

A pool air-source heat pump (ASHP) heater can maintain comfortable water temperatures for either outdoor or indoor pools, and is four-to-six times more efficient than electric boiler systems. Dakota Electric offers a rebate of \$400 for a new ASHP pool heating system or for the replacement of an electric resistance pool boiler system to an ASHP.

- Must be tested to AHRI 1160 testing standards.
- Must have a minimum Coefficient of Performance of 5.0
