### CONTACT THE ENERGY EXPERTS®

For questions regarding ground source heat pumps, please contact our Energy Experts at 651-463-6243.

Receive electricity at nearly half the regular rate when you participate in a Dakota Electric off-peak program. Participating members agree to let Dakota Electric interrupt power to certain electric loads when demand for electricity is high. Participating helps delay the need for further electricity generation and saves Dakota Electric and its members money — a win-win for everyone.

### FOLLOW THESE STEPS:

1. Try to get at least three estimates for any project.
2. Plan ahead: Contractors typically need two-to-three weeks from the date of estimating to completion of a job.
3. Member-supplied equipment should be on site when the contractor arrives to do the work or additional charges may be assessed by the contractor.

\*A back-up heat source is required for whole-house electric heat. Dakota Electric provides this list of contractors familiar with our Energy Wise® programs for your convenience. Dakota Electric does not specifically endorse any of the listed contractors or their products. Program is subject to change or cancellation without notice.
